

## ThinK-12 Gateway™

Simplifying access is one of the most effective ways to increase family engagement. Schools often invest in multiple digital tools, but families may struggle to adopt them due to login fatigue, especially those with multiple children in different grades or activities. **ThinK-12 Gateway™** removes this barrier by consolidating access into a single sign-on solution. Families no longer need to remember multiple passwords or navigate various platforms.

By having all external tools front and center in a consolidated, easy-access format, **ThinK-12 Gateway™** encourages families to log on regularly. The customizable dashboard showcases key information and resources, making it more convenient for parents to stay engaged with school activities and their child's progress.

With a mobile-friendly design, **ThinK-12 Gateway™** provides a seamless experience that not only enhances family satisfaction but also improves overall platform usage. IT support requests drop significantly, freeing up school staff to focus on other priorities. For families, the ease of access fosters stronger connections to school systems, keeping them more engaged in their child's education.

### Exclusive to Current Families

#### Key Features for Schools and Districts:

- Reduced IT support requests.
